SUMMARY
A customer-service professional of 10+ years, I developed teamwork, leadership, and communication skills, and… I know what it's like to be the new guy, from multiple professional experiences. I know the grind it takes to earn the respect of my peers and superiors. This will all be demonstrated in an **entry level software development role** at a company that values career development for its junior engineers.

SKILLS
Frameworks: React, Next, EJS, Styled-Components, Express, Material UI / Emotion
Languages: Javascript, CSS / SCSS, HTML, Node.js
Database: Mongo
DevOps: Git
Cloud Platforms: AWS code deployment

The Modern React Bootcamp Udemy Colt Steele September 2022
Advanced CSS and SASS Course Udemy Jonas Schmedtmann October 2022

PROJECTS
[sort-spotify.com](#) | [Github Repository](#)   *January 2023 - Present*
Full-stack web site that allows the user to sort through their "Liked Songs" playlist from Spotify and save the results as a new playlist in their account. Spotify does not yet provide this feature, and this website is likely the only in existence that does so.
- 3 monthly users
- 897 lines of React front end
- 285 lines of Express back end
- 1417 lines of custom CSS using the styled-components library / CSS in JS

[paulyprograms.com](#) | [Github Repository](#)   *January 2023 - Present*
Front-end focused showcase that features screen-recorded videos that walk the viewer through the functionality of other notable projects with commentary about the engineering process.
- 864 lines of React
- 1132 lines of custom SASS
